Example	monitor#
Expected Result	The device will call back.Voice monitor the device by answer the phone call.
Check Version	
Format	version#
Example	version#
Expected Result	Version: PT30_STUDENT_CARD_V2.0

4. Appendix

4.1 Battery security

Please use the original battery.

The warranty will be invalid by using any other accessory. The manufacturer will not take any responsibility for any damage caused by not using the original battery.

The new battery will achieve the optimal performance by fully-charging for 2 to 3 times. The battery can be used for hundreds of times, yet it will wear out eventually. When its talking time and standby time shrinks sharply, you need a new one.

Cut off power supply when not using the

charger. Don't charge the battery for more than one week, since over charging will reduce its using time.

Do not short-circuit the battery with metal stuff (such as the key in your pocket)

Do not bend or open the battery.

Do not put the battery into water or fire.

The battery should never be charged at temperature below 0 degrees or above 45 degrees Celsius.
